# AUTEN PEONIES

## FAMOUS FOR COLOR

### EDWARD AUTEN, JR. Princeville, Illinois

## *Auten Peonies Are Different*

Our ten acres of Peonies are growing in fertile "corn belt" soil, ideal for producing strong roots. We take extraordinary care to keep our plants healthy and true to name. Roots are dug to order and shipped to you fresh and full of vigor. We send liberal 3 to 5 eye divisions, properly cut. This is the best size to plant, better even than a large clump. See planting directions on back page.

### FREE PEONY — MONTEREY

If your order includes two or more Peonies listing at \$1.25 or more each, we will include free of charge a nice root of Monterey, Japanese type, very distinct and beautiful, a \$1.50 value. Or, if you prefer and ask for it, White Beauty, double, instead.

**YOUR EARLY ORDER** will be appreciated. We can give service at less labor cost on early orders, and early planting, though not imperative, is nevertheless highly advantageous. Because we have not advanced prices to cover greatly increased overhead, please keep above a minimum of \$2.00 in your orders.

**TERMS** — Cash with order. Prices include delivery in U. S. east of Rockies on orders of \$2.50 or more. Under \$2.50 add 25c for postage and packing. Pacific coast orders under \$10.00 sent express collect. Canadian orders, add 25c for postage, large orders sent charges collect. Send import permit, and remit in U. S. exchange. Any complaint as to condition of roots must be made immediately upon receipt of package. We make no warranty as to growth as we do not control conditions nor care in our customers gardens.

**SHIPMENT** — Fall only, beginning Sept. 1st, until ground freezes. We do not recommend spring planting of Peonies.

Every garden should contain some of these early bloomers. They cover a period of about 16 days before the common varieties start.

## THE AUTEN ORIGINATIONS

The high quality of the Auten Originations is generally recognized. They are the result of 28 years of work, combined with a deep interest in and a wide experience with hundreds of different varieties. To obtain the 190 varieties introduced many thousands of new seedlings have been raised. Reds of all types have been brought to new standards of brilliance and purity. Outstanding kinds of Japanese type are vastly superior in plant, vigor and color. Singles now are worthy to rank with the finest doubles. A very considerable contribution to the magnificent new hybrids has been made.

Whatever your needs or preferences may be as to type or color, you will find something in the Auten Originations that is outstanding, and in several of the classifications these new Peonies stand supreme.

## OFFICINALIS HYBRIDS

This new race of early bloomers is of surpassing beauty, giving entirely new shades, and reds more brilliant than any regular red variety. They start blooming about ten days before the common peonies, and the latest of them bloom with the first of the common kinds. They should be represented in every garden. All are Auten Originations unless otherwise indicated.

N.B. Strong divisions of all Hybrids will be sent, but because of their peculiar shape, some may have only one or two eyes.

### Planting and Cultural Directions

**IMPORTANT—Open your package of roots immediately** when they arrive. Plant as soon as possible but if you have to wait a few days, either keep moist in open box in cool cellar, or better yet, bury in garden.

Plant Peonies in good, well drained soil, in full sun if possible, and away from trees, buildings, etc. Do not plant where a peony has been before, unless all old soil is taken out and replaced with fresh. Plant 3 to 4 feet apart; set so that the eyes point upward and are 2 to 3 inches below the top of ground (very important). Give each root 2 quarts of water when planted, and then make a 6 inch mound of dirt above ground level to prevent heaving, scrape mound away late next spring.

In northern states, a mulch the first winter is advisable.
